

Teaching about Climate Change: Our Time Is Now

An Interdisciplinary Conference for Educators

Perfect for Social Studies, ELA, Science, STEM, and Librarian educators, the goal of this event is to provide its participants with the knowledge and best practices to teach about Climate Change. For a \$135.00 fee, participants will receive lunch, classroom-ready teaching resources, as well as two books for their professional use. To promote interdisciplinary teaching, all applicants are encouraged--but not required--to apply with "teams" of their colleagues from other subjects. Learn how to weave climate into your curriculum and how to inspire your students to be part of the worldwide solution. What you do matters, and our time, is now.

Tuesday, October 22, 2019
8:00AM - 3:00PM

Erie 1 BOCES Building B
355 Harlem Road
West Seneca, New York
